The Challenge

Established in 1870, Zurich Cantonal Bank is a major Swiss bank. Its IT architecture team is focused on maintaining its competitive edge while delivering exceptional service to its clients, including:

- Management of escalating complexity and regulations within the banking sector

- Essential agile management of a vast IT landscape for competitiveness

- Agile frameworks transforming IT-business interactions

- Daily regulatory compliance necessitating efficient IT resource management

The Solution

To address these challenges and meet the diverse needs of its stakeholders, the bank decided to build on its partnership of more than 10 years with Orbus Software, migrating from its on-premises solution iServer to its cloud-native platform, OrbusInfinity.

The Result

The adoption of OrbusInfinity has yielded transformative results for Zurich Cantonal Bank:

- Significantly improved accessibility and user engagement with IT data

- Streamlined document and workflow management through SharePoint integration

- Customized IT landscape management aligning with the bank's operational practices

- Enhanced capability in adapting to and managing regulatory changes efficiently

- Increased responsiveness to questions from external auditors and regulators

"

OrbusInfinity helps us visualize how each piece fits into our broader context, motivating our team and sharpening our focus on agility and sustainability."

Claus Hintermeier
Head of IT Architecture
