

Achieving Efficiency and Technological Rationalization

The Challenge

IMB Bank holds over \$8.1 billion in assets and is globally recognized for its excellence. To maintain its leadership status, it wanted to revamp its enterprise architecture. It needed a solution that would:

- Integrate with its existing technologies, such as Microsoft 365 and Visio
- Enable enterprise architects to establish a robust framework and allow subject matter experts to contribute effectively
- Aggregate various data sources into a single view for informed decision-making
- Simplify the complex TOGAF framework, making it accessible and valuable to all stakeholders

The Solution

IMB Bank selected OrbusInfinity for seamless integration with Microsoft 365, resulting in swift implementation and immediate insights.

- **Familiar technology:** Leveraged Microsoft 365 for easy onboarding
- **Rapid setup:** Re-ingested applications and recreated portfolio within two weeks
- **High-level insights:** Provided immediate strategic view and evolving clarity

The Result

OrbusInfinity played a pivotal role in IMB Bank's efforts to optimize its infrastructure, leading to substantial savings in manual effort, employee time, and costs.

- **Technology upgrades:** Reduced time to remove thin-client technology from 12 months to six, and decreased virtual workloads by over 50% within a year
- **Server reduction:** Turned off over 150 servers, reducing costs and administrative efforts
- **Platform rationalization:** Consolidated lending platforms, removed 300 applications, and reduced virtual server farm by 51%

OrbusInfinity offers the visibility and decision-making transparency to enable one person to tap into the mindsets of so many different subject matter experts.”
